PSY 390 Research Opportunity – Spring 2020

Virtual Reality and Relationships Study

Faculty member or graduate student
Chris Agnew, PhD, Professor, Social Psychology
Juwon Lee, PhD, Postdoctoral researcher, Social Psychology

Description of research area
We conduct research in the area of close relationships, particularly focusing on how virtual/augmented reality experiences will affect interpersonal relationships.

Description of undergraduate participation
Research assistants are expected to perform a variety of tasks that mostly include collecting data in the lab (being trained on and running participants) and data quality control. Work involves using the Facebook Oculus Quest VR device.

Research setting
Most work will be completed in the Psychological Sciences building. Research assistants are expected to spend most of their working hours in the lab.

Number of assistants needed
We are recruiting between 3 to 5 people. Research assistants are expected to work an average of 5-8 hours per week.

Contact information
