

# PSY 390 Research Opportunity – Fall 2021

## Faculty member

Dr. Darryl W. Schneider

## Description of research area

We conduct basic research on attention and cognitive control. Recent studies in our lab have examined alertness in selective attention tasks, as well as how people switch between tasks and resume interrupted tasks.

## Description of undergraduate participation

Students will be primarily responsible for help with data collection in behavioral experiments. They will also participate in regular lab meetings and discussions of research.

## Research setting

Experiments are conducted in my laboratory on the 3rd floor of the PSYC building.

## Number of assistants needed

We are seeking 2 students. Freshmen and sophomores are encouraged to apply.

## Contact information

Dr. Darryl W. Schneider

Office: PSYC 3174

## Additional comments

When contacting me, please provide the following information:

1. Year of study and major
2. Current GPA (minimum of 3.0 is preferred but not required)
3. List of any psychology courses you have taken
4. Brief description of any prior research experience (including PSY 390 in other labs)
5. Number of hours per week you would like to work in the lab (I prefer students who can do 9 hours/week for 3 credits, but 6 hours/week for 2 credits is also possible)
6. Indicate whether you are interested in working in the lab for more than one semester (I prefer students who can commit to at least two semesters)
7. Indicate why you want to work in our specific lab
