Faculty member & graduate student

Dr. Ximena Arriaga (faculty member) and Dr. Lucy Hunt (Post-doctoral Fellow)

Description of research area

The research in this lab examines romantic relationships: what makes them work and how they affect each person. Specific topics include: interpersonal and attachment security, managing aggressive relationships, and regulating doubt and uncertainty.

Description of undergraduate participation

Research assistants primarily will be involved in running a study with couples. They also will read and present articles related to the research areas described above, and perform other research tasks.

Many research activities will occur during weekday evenings and weekend days. There is a required weekly meeting on Fridays, 2:30 – 4:00.

Research Setting

Purdue campus, and possibly community areas.

Contact Information

For more information contact Dr. Arriaga for an application, Arriaga@purdue.edu.

Additional Information

Students interested in research careers are encouraged to apply. Interested students will be screened through the application process. Special consideration will be given to: students who possess strong social skills, sophomores, and/or students with a GPA of 3.0 or higher.
