Faculty member:
Louis Tay

Graduate Student:
Cassie Batz

Description of research area:

Our current research focuses on worker well-being and subjective well-being more broadly. Several of our current projects focus on gender differences in happiness, gender differences in negotiations, the measurement of virtues, and psychological well-being.

Description of undergraduate participation:

Undergraduate research assistants will help with the following tasks:
- Conducting lab experiments
- Designing online surveys
- Managing data
- Coding qualitative and quantitative data
- Conducting literature reviews on various topics related to subjective well-being
- Collecting and coding articles

Research setting:
In the lab conducting experiments, Data coding, data management, and literature reviews

Number of assistants needed:
1 or 2
