

PURDUE UNIVERSITY

ONLINE MASTER OF HEALTH ADMINISTRATION

BUILD A LEGACY WITHIN THE HEALTHCARE INDUSTRY

Amplify your healthcare leadership potential with Purdue's Master of Healthcare Administration taught by practice-based faculty. This degree covers a range of health administration-related skills, methods and tools to ensure cost-effective quality care and patient safety. Students will explore current health administration, health policy, and public health concerns facing the management of complex healthcare organizations. The objective is to prepare learners to handle real-world issues that healthcare managers face and the curriculum includes a capstone course where students apply what they have learned to a real healthcare administration problem.

WHAT YOU WILL LEARN

- > Identify the main components and issues of organization, financing and delivery of health services and health systems in the United States.
- > Demonstrate analytical and systems thinking to identify obstacles and opportunities in organizational processes and design.
- > Demonstrate leadership skills by supporting individuals and teams through coaching and mentoring to improve human capital.
- > Develop financial roadmaps by interpreting and communicating financial and accounting information, developing and evaluating program budgets, and strategically investing in long-term improvements.

"The Bureau of Labor Statistics projects that employment of health and medical services managers will grow 32 percent by 2029, much faster than the average for all occupations."

PROGRAM AT A GLANCE

13 COURSES | 40 CREDITS | 6 SEMESTERS

\$750 IN-STATE

\$850 OUT OF STATE

PROSPECTIVE STUDENTS

This program is intended for early and mid-career professionals looking to pursue administrator careers in health facilities. A healthcare background is preferred but not required.

FACULTY SPOTLIGHT

Cody Mullen, PhD

Clinical Associate Professor
Director, Master of Health Administration Program

"The U.S. healthcare system was already transforming from a sick-care system to one focused on population health prior to the COVID-19 pandemic hit on our country. As our country grapples with the aftermath of the pandemic, prepares for the potential of additional surges, and continues this population health transformation the need for skilled health administrators is great. Purdue is uniquely positioned to provide the needed skills in data-driven delivery and complex organization management and operation."
