

Greetings,

We were pleasantly surprised this morning when the Bloomington newspaper (the Herald-Times) carried a front-page story on the Photographic Scavenger Hunt! I apologize for any duplication of information, but the Indiana University Newsroom today also issued a shortened version of the press release:

<https://news.iu.edu/stories/2021/03/iub/releases/04-citizen-scientists-photo-document-indiana-flora.html>

## [Calling all citizen-scientists: IU Herbarium seeking photos to document Indiana's flora: News at IU: Indiana University](https://news.iu.edu/stories/2021/03/iub/releases/04-citizen-scientists-photo-document-indiana-flora.html)

IU Herbarium launches project to photo-document Indiana's flora. Thursday, February 25, 2021  
[biology.indiana.edu](https://biology.indiana.edu)

We have sent out follow-up communication to major newspapers throughout Indiana.

Please feel free to share the Biology Department link with your members, and we can provide high-resolution or low-resolution derivatives of any of the photos used in the press releases. We also have a large selection of additional photographs if you want something different.

Please contact me or Paul or Eric if you have any questions. We all monitor this fotohunt email account that we established for this project.

Sincerely,

Laura
