

Hi all,

In our last email, I mentioned that news would be coming regarding updates to the Scavenger Hunt website. It's time!

We now have a Progress tab on our website that contains a few new additions.

There are statistics on how many images have been processed and uploaded to the Consortium of Midwest Herbaria site, as well as a record of how many species have been removed from Hunt Lists or have changed priority status. These will both be updated regularly, so feel free to check in every month to see our progress.

We also have a featured photo of the month as well as links to a few Species Pages that are now beautifully illustrated with submitted photos.

You can find our new Progress page

here: <https://herbarium.bio.indiana.edu/progress/index.html>

Thank you for your continued participation and we ask that you keep the photos coming!

Laura White

Senior Curatorial Assistant + Photo Hunt Project Manager
Indiana University Herbarium
