

Swallowing and flavors study

Our research lab is recruiting participants for a study on how flavors might aid in swallowing disorders.

We are looking for individuals who are:

- 65 years of age or older
- Diagnosed with Mild Cognitive Impairment, Parkinson's disease, or Alzheimer's disease
- Have difficulty swallowing liquids

Participants must be willing to:

- Complete phone and in-person screenings
- Complete health questionnaires and physical assessments
- Provide medical history to confirm diagnoses
- Taste and swallow several flavored beverages, recorded by a video X-ray machine, under supervision of a speech language pathologist

Qualified participants will be paid:

- Up to \$20 cash for the first visit
- Up to \$20 cash for a second visit, if eligible
