

EDUCATION AND WORKFORCE

Micro-Grant Program

The IN-MaC micro-grant program aims to provide grant funding to organizations who implement manufacturing initiatives that enhance youth (K-12), post-secondary students, and the incumbent workforce.

Ranging from \$1000 – \$2,000, the micro-grants are designed to support innovation and encourage organizations to dedicate funds towards development and program implementation that impact and create manufacturing awareness.

IN-MaC Targeted Interests:

Projects focused on providing access to youth (K-12), post-secondary students, and incumbent workforce across the state of Indiana through:

- STEM Related Activities
- Hands-On Experiences
- Camps
- Expos
- Manufacturing Career Awareness

Innovative programs that focus efforts to increase access and awareness to manufacturing and serve as a model for other organizations and communities across Indiana.
