

DMDII

Industrial IoT USA

April 18–19, 2018 Chicago

The possibilities offered by IoT adoption within the industry are rapidly redefining all areas of business operations. Pioneering companies are connecting complex physical machinery with first-class analytics, bringing unforeseen insights, increasing efficiency and opening up a new era of competitiveness and growth.

The Industrial IoT Summit (hosted by UI Labs and DMDII) is designed to bring together both business executives and technical IT specialists from forward-thinking companies in the manufacturing, energy and transportation industries, with a stream dedicated to each group as well as plenary sessions addressing the whole conference. Attendees can expect the most up-to-date issues to be discussed and grasp a real understanding of key challenges within their sector.

Qatalyst Global is a senior-level Cyber Security Summit and Industrial IoT Summit provider. CS4CA Summit

Make the most of your 2 days!

- Understand the key steps in starting an Industrial IoT journey for your business
