

Quick facts on the LTAP MS4 Training Modules...
Module 4: Key Components of MS4 Post-Construction Programs After A Project Ends

THE POST-CONSTRUCTION TRAINING MODULE SERIES

These training resources are available at no cost to the user and are available on-demand via the LTAP website: www.purdue.edu/intlap/

MODULE 1: MS4 POST-CONSTRUCTION PROGRAM OVERVIEW

MODULE 2: POST-CONSTRUCTION PROJECTS OVERVIEW

MODULE 3: KEY COMPONENTS OF MS4 POST-CONSTRUCTION PROGRAMS BEFORE OR DURING A NEW PROJECT

MODULE 4: KEY COMPONENTS OF MS4 POST-CONSTRUCTION PROGRAMS AFTER A PROJECT ENDS

MODULE 5: STORMWATER POLLUTION PREVENTION PLANS

MODULE 6: POST-CONSTRUCTION BEST MANAGEMENT PRACTICES (BMPs)

MODULE 7: POST-CONSTRUCTION IN TIGHT SPACES & OTHER CHALLENGES

MODULE 8: POST-CONSTRUCTION BMP MAINTENANCE

MODULE 9: KEY COMPONENTS OF AN MS4 INSPECTION AND MAINTENANCE PROGRAM

MODULE 10: INSPECTING POST-CONSTRUCTION BMPs

MODULE 11: BMP MAINTENANCE WORK FORCE

Post-Construction Program Training
Module 4: Key Components After a Project Ends

 Local Technical Assistance Program

Module 4 is intended for MS4 or municipal staff interested in post-construction stormwater management. This module will examine the tools an MS4 has at its disposal to implement an effective post-construction program considering post-construction best management practices or BMPs over their lifetime after construction has concluded. Once construction ends, maintenance of post-construction BMPs begins.

Learning Objectives of Training Module 4 include:

1. To demonstrate how the ordinance, technical standards, and maintenance agreements give MS4s the necessary authority to enforce the post-construction program.
2. To review available tools to track post-construction BMPs, maintenance and inspection records, and complaints.
3. To develop ideas to fund the program and train staff, construction professionals, development professionals, and the public.
