Module 5: Stormwater Pollution Prevention Plans

Module 5 is intended for anyone that will be preparing or reviewing a stormwater pollution prevention plan (SWPPP). EPA defines a SWPPP as a plan that describes all construction site activities to prevent stormwater contamination, control sedimentation and erosion, and comply with the requirements of the Clean Water Act. This module will explore content, including examples and tips for developing an adequate post-construction SWPPP.

Learning Objectives of Training Module 5 include:

1. Define SWPPP and identify common post-construction SWPPP items.
2. Review examples of post-construction SWPPP components.
3. Discuss tips to develop a SWPPP that passes the first round of review.
