

After reading and reflecting upon the theory we explored this week, complete a brief response that addresses the following prompts. This response can be informal in nature---meaning that it is a personal reflection and does not require citations, etc. unless you feel they are needed.

**Completing the reflective questions assignment is completely optional. However, you can earn up to 5 extra points if you complete all 5 reflective assignments offered this semester.**

1. What is your biggest take-away regarding the theory?
2. Share an example from your personal or professional role that relates (either positively or negatively) to the theory.
3. Share an item related to the theory that you have seen in the news or on social media.
4. Are there aspects of the theory that you disagree with?
5. What questions do you still have regarding the concept?
