# Hotseat Integration with Brightspace

Adding a Hotseat LTI Link in Brightspace

1. **Open** a web browser, **navigate** to purdue.brightspace.com, and **log in** using your Purdue Career Account credentials**.**

2. **Open** the course that will be using Hotseat, **click** 'Content', and **navigate** to the module location where the link to Hotseat should reside.

3. **Click** 'Existing Activities' and **select** 'External Learning Tools' from the drop-down.

4. **Select** 'Hotseat' from the list of options.

5. By default, Hotseat will launch within Brightspace which can have some issues with some privacy focused browsers such as Safari. If you would like Hotseat to open in a new browser tab instead of within Brightspace, **click** the drop-down icon to the right of the Hotseat topic, **select** 'Edit Properties In-place', and **check** the 'Open as External Resource' option.

6. **Click** the newly created link to launch Hotseat. Please note that you will need to set up your course in Hotseat separately.
