“SOUPER” TUESDAY
at NAECC
A new four-part series from Providence Pictures premieres on PBS. Weaving history and science with living Indigenous traditions, the series brings to life a land of massive cities connected by social networks spanning two continents, with unique and sophisticated systems of science, art, and writing. Made with the active participation of Native American communities and filmed in some of the most spectacular locations in the hemisphere, NATIVE AMERICA illuminates the splendor of a past whose story has for too long remained untold.

**Episode 1 - From Caves to Cosmos**
Combine ancient wisdom and modern science to answer a 15,000-year-old question: who were America’s First People? The answer hides in Amazonian cave paintings, Mexican burial chambers, New Mexico’s Chaco Canyon and waves off California’s coast.

**Episode 2 - Nature to Nations**
Explore the rise of great American nations, from monarchies to democracies. Investigate lost cities in Mexico, a temple in Peru, a potlatch ceremony in the Pacific Northwest and a tapestry of shell beads in upstate New York whose story inspired our own democracy.

**Episode 3 - Cities of the Sky**
Discover the cosmological secrets behind America’s ancient cities. Scientists explore some of the world’s largest pyramids and 3D-scan a lost city of monumental mounds on the Mississippi River, native elders reveal ancient powers of the sky.

**Episode 4 - New World Rising**
Discover how resistance, survival and revival are revealed through an empire of horse-mounted Comanche warriors, secret messages encoded in an Aztec manuscript and a grass bridge in the Andes that span mountains and centuries.
