Community Manager for the Purdue IronHacks WANTED

Are you outgoing online? Do you have great writing skills and social media experience? Do you like to keep the conversation going and to help online communities? Do you want relevant marketing and PR skills on your CV? Then you want to be the Community Manager of the Purdue IronHacks, a unique initiative run by the Research Center for Open Digital Innovation (www.purdue.edu/opendigital) on open data and digital applications. If you want to help Purdue developers to turn their applications into something useful by answering their questions and keeping the online discussion going on our Reddit-style forum, then you should apply today!

Responsibility:
This position relates to an experimental research program running from March to April 2016. You can start today and become part of our dynamic team!

Requirements:
There is no extensive experience required – this is a great stepping stone towards gaining work experience on your CV! You should be a regular user of social media outlets such as Facebook and Reddit (preferable, but not a requirement). You should have an outgoing personality, solid writing skills, and be willing to respond to the community of developers online around the clock in a period of 4 weeks from March to April 2016.

Contact: Prof. Sabine Brunswicker and Allison Lamb at opendigital@purdue.edu.
