Digital applications user experience evaluator WANTED

Are you a regular user of digital applications (websites, mobile applications)? Do you want to evaluate applications created to improve the lives of citizens in West-Lafayette and Lafayette? Do you want to be part of a unique initiative run by the Research Center for Open Digital Innovation (www.purdue.edu/opendigital) on open data and digital applications that create true value for users? Are you excited about information visualization and interactive services that improve our daily life? If you want to help Purdue hackers to turn their hacking skills into useful applications, then you should apply today.

Responsibility:
This position relates to a research program running from March to April 2016. You can start today. Being part of the IronHack team would require you to be available on Mondays through Thursdays from March to April 2016 to be part of the evaluation team. You would test and evaluate novel software applications created by a group of 40 to 60 hackers.

Requirements:
There is no particular experience required! You should be a regular user of digital applications like Google Maps, and you should be excited about digital innovations that make life easier.
