VEHICLE SAFETY INSPECTION FORM

Transportation Service Shop | (765) 494-2121

Inspection Date: _____	Mileage: _____	PU Vehicle #: _____	License #: _____
Year: _____	Make: _____	Model: _____	Inspected by: _____

Complete if not at Transportation Service Garage:

<i>Location:</i> _____	<i>Address:</i> _____	<i>Phone:</i> _____
---------------------------	--------------------------	------------------------

INSPECTION STATUS

Mark each item as S - Satisfactory or U - Unsatisfactory

Inspection item	S	U
Seat & shoulder belts - if OEM	☐	☐
Headlights (upper & lower beams)	☐	☐
Taillights (stop & turn signals) - if OEM	☐	☐
Horn	☐	☐
Windshield	☐	☐
Windshield wipers	☐	☐
Window operation	☐	☐
Door latch operation	☐	☐
Parking brake	☐	☐
Mirrors	☐	☐
Floorboard integrity	☐	☐
Suspension	☐	☐
Shock absorber/strut condition	☐	☐
Springs & spring mountings	☐	☐
Driveline; U-joints & CV joints	☐	☐
Brake lining (remove 1 front & 1 rear wheel)	☐	☐
Brake lining thickness FR: _____ RW: _____	☐	☐
Brake hose condition	☐	☐
Steering	☐	☐
Master cylinder leakage	☐	☐
Master cylinder fluid level	☐	☐
Exhaust system	☐	☐

TIRE TREAD DEPTH AND TIRE PRESSURE

Tire position	Tread depth	Tire pressure
Left front	_____	_____
Right front	_____	_____
Left rear	_____	_____
Right rear	_____	_____

Requirement: Tread depth must be 3/32 of an inch or greater on all tires.

Repairs / Remarks

If the vehicle needs repair and was not repaired, list the item(s) below.

INSPECTION NOTES AND CRITERIA

Inspection area	Requirement / note	Checked
Seat belts	Required if model year 1973 or newer.	☐
OEM lights	All OEM lights must be operational.	☐
Windshield	Must be crack- and obstruction-free in front of the driver's field of view.	☐
Windshield wipers	Must operate on the driver's side.	☐
Driver's window	Must operate if the vehicle is used on public highways.	☐
Doors	The driver's-side door must operate. All doors must latch.	☐
Mirrors	Vehicle must be equipped with at least one rear-view mirror inside and one outside, or left and right outside mirrors if there is no inside mirror.	☐
Steering	All steering components must pass safety inspection.	☐
Floorboards	Must not be rusted through, allowing openings to the outside.	☐
Brakes	Check brakes by removing at least one front and one rear wheel and measuring lining thickness.	☐
Brake hoses	No breaks, cracks or leakage.	☐
Master cylinder	Must hold pressure when the brake pedal is depressed.	☐
Exhaust system	Must be leak-free to eliminate exhaust from leaking into the passenger compartment.	☐
Tires	A tire is considered unsafe if it has any bump, bulge or known defect affecting the tire structure. A break, cut or weather checking that exposes a tire body cord is considered unsafe.	☐
