1 Shingles

1.1 Roofing shingles shall be fiberglass reinforced asphalt carrying a minimum of 30 year warranty.

1.1.1 Shingles shall be algae resistant.

1.2 Color, style, and other characteristics must be approved.

2 Clay Tile

2.1 Color and style of clay tile roofing is a design consideration and will depend on the application and the location on campus and must be approved.

3 Slate

3.1 Use of slate on campus has been limited, with the Purdue Memorial Union being the most prominent example.

3.2 Color, style, and other characteristics of slate roofing will be treated as a design decision and will be dependent on several factors.

4 Specialty Roofing

4.1 Roofing materials not listed above, including any “mimic” materials such as synthetic slate or metal tiles, will be considered in discussion with the project manager.
