1 Keying
1.1 The Purdue Lockshop will procure cylinders, provide keying, and install cylinders on all academic building projects. Residence Halls staff will provide cylinders and keying for all residence hall projects.

2 As built schedules
2.1 Furnish ‘as-built’ or ‘as-installed’ schedule with closeout documents, including:
   - keying schedule
   - wiring/riser diagrams
   - manufacturers’ installation, adjustment and maintenance information
   - supplier’s final inspection report

3 Automatic door operators
3.1 Automatic door operators used for accessibility purposes shall be electro-mechanical.
   3.1.1 Besam Automatic Entrance Systems, Inc., model SW200i for high traffic and/or exterior doors
   3.1.2 LCN Closers, Inc., Benchmark
   3.1.3 Norton Door Controls, model 5900

4 Commissioning
4.1 Conduct commissioning tests three weeks prior to request for certificate of substantial completion.
4.2 Test door hardware operation with climate control system and stairwell pressurization system both at rest and while in full operation.
4.3 Test electrical, electronic and electro-pneumatic hardware systems for satisfactory operation.
4.4 Test hardware interfaced with fire/life-safety system for proper operation and release.

5 Warrantees
5.1 Provide manufacturers’ standard warranties for all hardware.

6 Mortise locksets and latchsets
6.1 Sargent 8200 Series, LW1B or LW1J.

6.2 Accepted substitutions: Schlage

7 Electromagnetic hold-open closers
7.1 Integrate with UL listed fire/life-safety alarm systems.
7.2 Multi-point units to have hold-open bypass at 80 deg or 140 deg. Closers to be swing-free/no-drift arms at pull-side mounted units.

8 Low operating force units
8.1 Doors with automatic door bottoms plus head and jamb seals cannot require more than two pounds operating force to open when closer is disconnected.

9 Wall & Floor-mounted Electromagnetic Door Holders
9.1 LCN’s to be SEM series or approved equivalent. Incorporate into U.L.-listed fire & life-safety system such that doors are to release to allow closure and latching when door’s zone is in alarm state.
9.2 Use the minimum projection required to allow door to open as widely as allowed by wall conditions and projection of door hardware.
