Physician Assistant (PA-C)

Career Description

- Physician assistants provide diagnostic, preventive and therapeutic care as designated by a licensed physician.
- PAs are trained as generalists but can also work in specialty areas. They perform physical exams, diagnose and treat illness, order and interpret lab tests, prescribe medication, suture wounds, assist in surgery, provide patient education and counseling, and make rounds in hospitals.
- Nearly 40% of PAs practice in hospital settings. An equal number work in group and solo-physician offices. The rest are found in rural and community health centers, nursing homes, surgical facilities, school and college-based health centers, industry, and correctional facilities.
- Originally PA programs were created to train former military corpsmen to practice medicine and provide care for people with limited access to health care.
- In recent years, the field has included students directly from undergraduate studies as well as practitioners from a variety of healthcare fields.

Becoming a Physician Assistant

- To attend one of the accredited PA master’s programs, a bachelor’s degree in any major along with appropriate prerequisite courses (see below).
- **Considerable health care experience** (generally hands-on patient care) is needed to be admitted to most programs. Some require as many as 2,000 hours.
- PA students spend more than 2,000 hours in clinical rotations including specialties in family medicine, pediatrics, emergency medicine, internal medicine, general surgery, psychiatry, and obstetrics/gynecology.
- Training is competency based. Once clinical training is finished, students must pass the national PA certification exam to become a PA-C and then be licensed in their state.

Preparation

- Observe a PA to make sure this the right field and that you truly understand what a PA does.
- The most significant hurdle to a competitive application is the hands-on patient care requirement. Schools have different opinions on the experiences they value. Generally you will need additional training so you can work in a health care setting.
- Course requirements can vary substantially between programs. You should research programs to which you would like to apply early in your academic career to make sure you meet their requirements.

Common Prerequisite Courses (pre-reqs determined by each PA school & may vary from this list)

Researching Programs

Physician Assistant Education Association Program Directory http://directory.paeonline.org/

Applying

- Some programs require the Graduate Record Exam (GRE).
- The initial application to most PA programs is through an online application service called the Central Application Service for Physician Assistants (CASPA).
- The competitive applicant will have:
  - Strong academic performance including a grade point average of 3.5 or better
  - Scores above the national average on the GRE
  - Leadership, teamwork, and communication skills
  - Undergraduate research experience is a plus
  - Volunteer and shadowing/observation experience
  - Significant hands-on patient care hours
  - Strong positive letters of recommendation (mostly from science faculty and physicians or PAs)
- Early application is important as most programs are relatively small.

Fee Assistance

- GRE Fee Reduction Program https://www.ets.org/gre/revised_general/about/fees/reductions/

Employment Outlook

- According to the Bureau of Labor Statistics, the PA field can expect continued job growth of 37% through 2026.
- Median pay for a PA was $108,610 in 2018.
