Pre-Registration Demonstration

Traditional STAR Advising Appointment
Horticulture: Plant Science Concentration, BS

About the Program
Plant science is an option which includes training to improve plants through genetic manipulation and to investigate new methods of propagation, growth, handling, and marketing of horticultural crops. Horticultural scientists work at colleges and universities, state and federal experiment stations, and public or private laboratories and foundations. This curriculum prepares students for scientifically oriented careers such as technicians in plant breeding, propagation, and research industries. It is an excellent preparatory program for students planning to pursue postgraduate study toward a M.S. or Ph.D. degree.
