HONR 29900: INTRO TO RESEARCH PLANNING

In this course you will take an idea and blow it up. You will “blow it up” to better understand its elements and its connections to various ways of creating knowledge. Then you will take the resultant pieces and use them to construct a research plan that is inclusive of at least two forms of inquiry. The primary learning objective is that you are able to create a research proposal from some idea, observation, or problem that interests you, so that you can implement the plan as you launch your undergraduate academic journey. Your time in this 5-week course will revolve around your idea and your exploration of creative ways to do something with it.
