Protocol post-approval monitoring policy

An important part of Purdue University’s program for the care and use of animals used in research, teaching, or testing, is the meaningful monitoring of the protocols that have been approved by the PACUC. The protocol post-approval monitoring policy has been developed to contribute to this important oversight requirement. The protocol post-approval monitoring process could involve laboratory/site visits to observe animal procedures being performed, evaluate record keeping, and discuss approved activities.

Protocol post-approval monitoring process and procedures

Protocol post-approval monitoring visits may be announced or unannounced. Post-approval monitoring visits will be conducted by one of the laboratory animal veterinarians (LAV) and the PACUC Administrator.

The approved protocols will be prioritized to determine the frequency and order of monitoring, based on the potential for pain and distress, significant personnel changes, and current activity of protocols. Problems or deficiencies noted on these visits will be corrected at the time the deficiency is noted and further training/education provided, if needed. A summary of these visits, and actions taken to correct the deficiency, will be reported to the PACUC by the LAV or PACUC Administrator at the next monthly meeting.

Post-approval monitoring will be conducted using the Protocol Post-Approval Monitoring Form and a database will be utilized to aid in the prioritizing of protocols.
Purdue Animal Care and Use Committee (PACUC)

Protocol Post-Approval Monitoring Form

~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~

Principal Investigator: ____________________________  Protocol #: ____________________________

Protocol Title: ____________________________________

Species: ____________________________  Site Visited: ____________________________

Personnel Present: ____________________________________

Monitoring Team: ____________________________________

Monitoring Date: ____________________________  Monitoring Time: __________

PROTOCOL AND PERSONNEL SECTION

___ Y ___ N  1. A current copy of the approved protocol (and subsequently approved amendments) is available in, or near, the site visited.

___ Y ___ N  2. All personnel involved in the project are listed on the protocol and have completed the PACUC orientation program and the occupational health program participation/declination form.

___ Y ___ N  3. The principal investigator and all project personnel have accurate knowledge of the procedures approved on the protocol and have received training relevant to the project.

___ Y ___ N  4. The principal investigator and other project personnel (working without direct supervision) have accurate qualifications documented in the PACUC office via Animal Care and Use Qualification Forms.

NOTES: ____________________________________

Last approved by PACUC 12/19/2012
STUDY PROCEDURES SECTION

__ Y __ N 5. The procedures being conducted are approved in the protocol or amendments.

__ Y __ N 6. The site visited has a dedicated workspace for the animal procedures being conducted.

NOTES: __________________________________________________________

______________________________________________________________

______________________________________________________________

______________________________________________________________

ANESTHESIA SECTION

__ Y __ N 7. The methods of anesthesia used are approved in the protocol.

__ Y __ N 8. The anesthetized animals are appropriately monitored according to the protocol.

__ Y __ N 9. The inhalant anesthetics are properly scavenged or exhausted.

__ Y __ N 10. The anesthesia dosages, frequency, and routes of administration are recorded.

NOTES: __________________________________________________________

______________________________________________________________

______________________________________________________________

SURGERY SECTION

__ Y __ N 11. The surgeries are appropriately recorded.

__ Y __ N 12. The surgical procedures are performed in an approved area.

__ Y __ N 13. The facilities are clean and organized.
14. The use of sterile gloves and instruments are utilized when performing recovery surgery.

15. The animals are aseptically prepped when performing recovery surgery.

NOTES:

POST-SURGICAL/PROCEDURAL CARE SECTION

16. The post-surgical/procedural monitoring and care being performed are as approved in the protocol.

17. The analgesics used are as approved in the protocol and available.

18. The analgesic dosages, frequency, and routes of administration are recorded.

19. The post-surgical/procedural care is recorded.

20. The recovery area is appropriate.

NOTES:

EUTHANASIA SECTION

21. The methods of euthanasia are as approved in the protocol.

22. The euthanasia dose and route of administration are recorded, if applicable.

NOTES:
