The Science Alumni Summer Research Fellowship is funded by Science alumni to support an undergraduate summer research experience. This fellowship is open to College of Science students who are rising juniors or seniors with a minimum GPA of 3.0. Eligible students must be working on their own research project at Purdue for Summer, 2022. A $2000 stipend will be awarded for a 10-week summer research experience and may be supplemented by the research mentor. The fellowship recipient will present their research to the Science Alumni Board during the 2022-2023 academic year.

**Deadline: April 1, 2022**

Student ________________________________________________________________

Research Project name __________________________________________________

Research Mentor, College of Science department ________________________________

Email ________________________________________________________________

I verify that the student named above will conduct their own research project during the summer of 2022 under my direction.
