Base Laboratory Requirement (BLR) for all Biology Majors

1. Students must complete one of the “Required” courses in the chart below. Undergraduate research cannot be used to meet this requirement.
2. Students must also complete Objectives A and B as listed in the chart below with courses or research or a combination of the two.
3. **Descriptions of Objectives A and B** (not all tasks must be met to satisfy an objective):
 - a. **Objective A** – Demonstrate the ability to plan and design hypothesis-driven experiments, simulations or discovery/observational experiments
 - i. Conduct an appropriate literature review for a specific scientific topic.
 - ii. Generate an applicable hypothesis (-es) for your research project
 - iii. Identify techniques to be used in your project, with justification of those techniques.
 - iv. Write a formal research proposal.
 - v. Write a detailed outline of experiments
 - b. **Objective B** - Develop the ability to appropriately analyze, critically evaluate, and depict data. Demonstrate the ability to effectively communicate scientific information orally and in writing, including synthesizing and evaluating scientific literature and putting experimental results in their appropriate scientific context.
 - i. Analyze data
 - ii. Use appropriate ways to depict and communicate data (e.g., graphs, movies, images, etc.). Present the research at lab meetings, in a talk, or at a poster session.
 - iii. Write a summary (or summaries) of the data.
4. If research is used, the research director will be the one who decides if the research meets Obj A and/or Obj B.
5. If research is used, it must include at least four credits of BIOL 49400 or 49900. BIOL 29400 research does not count toward this requirement.
6. Students who successfully complete a Biology Honors Research Thesis have successfully met Objectives A and B but must still complete a “Required Course.”
7. The *“Microbiology”* and the *“Health & Disease”* majors both require BIOL 43900; the *“Ecology, Evolution and Environmental Biology”* major requires BIOL 59500 Laboratory in Ecology.
