### Program Progression Guides

**Disclaimer**: The 2024-2025 Purdue West Lafayette catalog is considered the source for academic and programmatic requirements for students entering programs during the Fall 2024, Spring 2025, and Summer 2025 semesters. The Program Progression Guide assists students in the development of an individualized 8-semester plan. Students are encouraged to use this guide and MyPurduePlan* (online degree auditing tool) as they work with their academic advisor towards the completion of their degree requirements.

**Notification**: Each student is ultimately responsible for knowing, monitoring and completing all degree requirements.

An undergraduate degree in the College of Science requires completion of the following degree requirements.

REQUIRED RESEARCH FOR THE CBB MAJOR

Research is required for this major. Students can participate in research as early as they can find a relevant opportunity but must start at least by Fall of Junior year. Research that will count towards the CBB major requirements needs to be related to Chemical Biology & Biochemistry topics. Below are examples of such topics. To be sure their research experience will count for CBB requirements, students need to work with one of the Faculty within the Biology and Chemistry Departments whose research is CBB-related as shown in the table below. Once a student finds a research opportunity and is joining a lab they need to request an application for research from their Academic Advisor.

Examples of topics related to Chemical Biology & Biochemistry

- Chemical principles of biological processes
- Chemical processes in living organisms
- Molecular biology
- Structural biology
- Enzymes and enzyme activity
- Drug development
- Lipid membrane
- Protein
