Computer Science Criteria

The university generally examines performance in three distinct areas in its consideration for promotion. These areas are: teaching, scholarly work and research, and service (to the department, university or community). Each individual case is considered in depth; there are no fixed criteria for evaluation or decision. Assistant Professors should note that it is unlikely they will be promoted if their performance in teaching is judged as being inadequate, or if their performance in scholarly work and research fails to show promise of achieving national distinction.
