

Statement of Assurances

1. Our school is pleased to be a participant in the Science Express program. As the building administrator, I am aware that the instruments will be used in the classroom by students. In conjunction with the participating teacher, we will see that the instruments are visibly inspected for damage when delivered by the trained participating teacher, protected from indiscriminate student use, theft, or malicious damage by keeping the instruments in a supervised area during usage and in a locked area when not in use.
2. **Disclaimer:** Materials and activities included in the Purdue Instrument Van Project have been field-tested and are believed to be safe and accurate when used as written and under appropriate laboratory conditions. However variation in local conditions may affect your outcome. We recommend that you test all activities for safety and reliability before using them in your classroom. The authors assume that good laboratory practice will be followed when using these activities. This includes, but is not limited to the use of appropriate hand, eye, and clothing protection.
