What’s New in Science Express?

- Just a quick reminder that Science Express will stop deliveries/pick-ups December 20, 2019 and resume service on January 3, 2020. Also be aware that if you want equipment the first week we are back you need to submit your request by your corresponding delivery day the week of December 16-20.

- All Science Express videos are now hosted on YouTube. This should have a minimal effect on viewing the videos, but I wanted to make everyone aware of the change in case you get a security message saying you’re being redirected or if your school has YouTube blocked. Comments are disabled on our channel, so if you have a question or comment you can send it directly to Zach.

Science Express will host an abbreviated new teacher workshop on January 16th, 8:30-3:00 at Purdue. There is no fee for the workshop, but to attend you need to be a high school science teacher at a school we currently serve. You also need to register by January 8th. The online registration can be found here: https://forms.gle/k3Ju2kog8sbMVk6m7

This workshop will cover Science Express procedures and Vernier equipment training. We look forward to working some fresh teachers!

For questions or more information please contact Zach Grigsby at zgrigsby@purdue.edu

Upcoming Events

- 12/7 - Saturday Morning Astrophysics (Lives of Stars)
- 1/11 – Saturday Morning Astrophysics (Impact Craters Near and Far)
- 1/16 – New Teacher Workshop @Purdue 8:30-3:00
- 2/8 - Saturday Morning Astrophysics (Kepler’s Laws and Planetary Motion)
- 2/9-11 – HASTI @Wyndham Indianapolis West
- 3/7 - Saturday Morning Astrophysics (How Long Ago, How Far Away)
- 4/11 - Saturday Morning Astrophysics (Radio Astronomy)

Happenings

- Please find Science Express and like us on Facebook: @PurdueSE

- November was a bit of a slow month for Science Express. We had 1268 student/instrument interactions. We made 36 school visits to 18 teachers in 11 schools.

- Saturday Morning Astrophysics at Purdue (SMAP) is a monthly program for Indiana high school and upper level middle school students offered by Purdue University Physics and Astronomy Outreach.
