What’s New in Science Express?

- With funding received from Duke Energy, we are working to add new ICP kits to the Science Express program. The kits will cover the topics of energy, atoms, light, separation of mixtures and density, and forces. The labs are on the website now in the Integrated Chemistry Physics section, if you would like to take a look at them. We have decided that instead of training in person, we will have how to videos to go with these kits. We will notify everyone when these videos are available and you can start reserving the kits. Thank you for your patience.

- Just a quick reminder that a lot of teachers still do not have their statement of assurances turned in. You can find it here. We only keep an electronic copy of it, so you can just scan it or take a picture of it once it is signed by you and your principal and email it to Zach. Thanks!

We have great news, we have hired a Science Express driver! His name is Matt Vawter. Matt is a Harrison High School graduate and used Science Express equipment in his high school science classes. Matt has already started his training, so Bill and Zach will still come out to schools with Matt for the next few weeks. Please be sure to give him a warm welcome when he comes to your school!

Upcoming Events

- 10/12 - Saturday Morning Astrophysics
- 10/26 - Saturday Morning Astrophysics
- 11/9 - Saturday Morning Astrophysics
- 12/7 - Saturday Morning Astrophysics

ICP Atoms Kit

Happenings

- Please find Science Express and like us on Facebook: @PurdueSE

- September was a busy month for Science Express! We had 4288 student/instrument interactions. We made 138 school visits to 69 teachers in 25 schools.

- Saturday Morning Astrophysics at Purdue (SMAP) is a monthly program for Indiana high school and upper level middle school students offered by Purdue University Physics and Astronomy Outreach. For more information following the link:
