What’s New in Science Express?

- With funding received from Duke Energy, we are working to add new ICP kits to the Science Express program. The kits will cover the topics of energy, atoms, light, separation of mixtures and density, and forces. The labs are on the website now in the Integrated Chemistry Physics section, if you would like to take a look at them. Once they are complete we will announce training dates.

- You probably noticed when you filled out your participant information form that it ask for the number of students you will be using Science Express equipment with during the year. This helps us to get demographic information about the students we serve. So, thank you for taking the time to fill this important information out!

Science Express is looking to hire a delivery driver/equipment refurbisher for this school year. This individual needs to have a clean driving record, ability to repeated lift 50lbs, have good customer service skills, and be dependable. The job is currently one year in duration, but could become permanent. This position is full time and comes with benefits.
