August 11, 2016

Hello:

Our College of Engineering continues to be ranked in the top 10 nationally in virtually all engineering disciplines, and our Ph.D. programs are fully-funded. This means all admitted Ph.D. students receive a guarantee up to five full years of funding in their admissions offer letter (tuition, health insurance, and monthly living stipend). Students can apply for our Ph.D. programs directly upon the completion of their bachelor’s degree. Michigan Engineering departments and areas of specialization: [http://grad.engin.umich.edu/home](http://grad.engin.umich.edu/home).

To encourage you to consider Michigan Engineering, we offer several visit opportunities:

1. **Prospective Student Day** (Juniors and Seniors)  
   Friday, November 11, 2016  
   [http://gradsymposium.engin.umich.edu](http://gradsymposium.engin.umich.edu)  
   *Prospective graduate engineering students will have the opportunity to attend the College’s premier on-campus visitation program. This includes touring departments and research labs, interacting current graduate students, and talking to your peers from across the country. Along with admission and funding workshops, prospective students can also attend poster sessions featuring U-M current graduate students’ research. Travel grants are available for some prospective Ph.D. students: [http://gradsymposium.engin.umich.edu/home/registration-and-travel-grants](http://gradsymposium.engin.umich.edu/home/registration-and-travel-grants)*

2. **Engineering Department Visits** (Seniors)  
   February and March, 2017  
   [http://deptvisits.engin.umich.edu](http://deptvisits.engin.umich.edu)  
   *Selected Ph.D. applicants for the fall 2017 term are invited to campus to meet with faculty, tour departments and labs, mingle with current graduate engineering students and experience campus life in Ann Arbor. Many of the students who visit are admitted and enroll in our Ph.D. engineering programs. All associated costs are covered (flights, hotels, meals, etc.).*

3. **Engineering Summer Research Opportunity Program** (Juniors)  
   Late May to Late July 2017  
   *Students receive a $4,000 summer stipend, on-campus housing, some meals, transportation allowance for flights or mileage, GRE test prep course, etc.*
Prospective students interested in pursuing a graduate degree that have a 3.5 or better cumulative undergraduate GPA may request a fee waiver for the graduate admissions application this fall. Send requests along with your resume to Kim Elliott, elliottk@umich.edu.

If you have an interest in pursuing a Ph.D. or Master’s degree in engineering, please complete this short form so we can keep in touch: https://www.engin.umich.edu/form/coeinquiryform.

Enjoy the summer!

Kim Elliott
