

# Sustainable Biomaterials Major

## The goal of SUBO is to:

- Prepare students for principles of sustainability understanding and contribute to global sustainability movement.

## Program Integrates

- Sustainability
- Material Knowledge
- Product Design
- Technology
- Processing

## Why Should Students Pick this Major?

- Huge employment opportunities
- Making good wages
- Growing sectors with global impact
- Scholarships and internships
- Involvement in research
- Connectivity with industry
- Variety of careers to match talents
- Study abroad opportunities

## What are Sustainable Biomaterials

- Biological materials from the nano to the macro scale.
- Wood is the most important sustainable biomaterial; it is renewable, recyclable, and biodegradable
- The promotion of appropriate utilization of sustainable biomaterials will contribute to sustainability.
